Placenta Facial - This intense anti-aging treatment significantly firms the skin, reduces the appearance of deep lines and wrinkles, and provides a noticeable lift to the skin. A protein-rich serum of placenta and seaweed is applied to the skin via a saturated fabric mask which encourages the skin's natural collagen and elastin production, revitalizes the cells and provides intense moisturization.

Oxygen / Vitamine Skin Therapy - This treatment is designed to infuse the skin with highly concentrated molecular Oxygen and topical, mycelized vitamins. Through this process, cellular respiration and metabolism are increased. This treatment stimulates tissue detoxification and is an excellent choice for acneic, congested or sluggish skin conditions, as well as an excellent choice to rejuvenate and regenerate the skin.

Anti-acne Treatment - This deep-pore cleansing treatment is an introduction to the topical application of Probiotics using acidophilus probiotic masque/cream, enzymes and Propolis. This treatment is highly recommended for sensitive or problem skin as well as to stimulate natural metabolic function of normal skin. With these results oriented treatment great results can be accomplished.

Enzyme Facial - Designed to energize the skin cells with a unique rejuvenating enzyme process, this facial uses a proprietary blend of digestive enzymes, fruit acids, resorcinol, hydroxyacetic acid, herbal extracts and distillates. This treatment is especially helpful for sun damaged and premature ageing skin. A second masque is also applied that will activate deeper cellular activity. You will see an immediate difference in your skin with the very first treatment.

Pro-Collagen III Intensive Facial - Collagen III is the collagen of our youth. When we were four years old, approximately 90% of your Collagen was type III. Throughout the natural ageing process this type diminishes to Collagen I. When we are 50 years old approximately 90% of our Collagen is type I. The skin's production of Collagen III is the primary reason that young skin cells do not wrinkle. This cutting-edge facial helps return skin to this more youthful state.

Silver Ion Mask Treatment - The Silver Ion Mask has been introduced for a wide variety of therapeutic uses for plastic surgeons, dermatologists, massage therapists and licensed aestheticians. This revolutionary new treatment aids in relaxation and soothes inflammation of the face after laser resurfacing, acid peels, microdermabrasion and general body aches and pains. Clinical observation has revealed that when a highly conductive material, such as the Silver Ion Mask is placed in direct contact with the skin over the treated area, the body's electrical skin surface potential is restored to more normal levels. This treatment enhances and restores the skin surface and reduces inflammation of underlying tissues aiding in the healing of those soft tissues. This treatment can be a wonderful addition to any facial.

Back Facial - This amazing exfoliating and deep pore cleansing treatment is for one of the most neglected areas of the body.

EyeLid Hydration - This procedure is specially formulated to hydrate and nourish the delicate eye area.

Microdermabrasion - Microdermabrasion is a fast and easy way to rejuvenate and revitalize your skin in less than half an hour. The combination of the fine abrasive action of the wand is coupled with a vacuum suction to remove the dead outer layer of skin bringing the new, softer skin with a more even texture to the surface.

Microdermabrasion is ideal to treat sun-damaged skin, age spots, superficial pigmentation, fine lines and wrinkles, clogged pores, blackheads and whiteheads, and some mild acne scars. The neck and chest can also be treated to blend the skin and remove any sun damage often found in that area.

Patients can immediately return to their normal activities. All skin colors can be treated. It is a wonderful way to achieve younger, vibrant-looking skin while still keeping up with your busy lifestyle.

The Cosmopolitan™ A Cocktail for Beauty - The proprietary Cosmopolitan Facial at Lancer Dermatology effectively treats unwanted skin pigmentation leaving patients with a noticeable improvement within one week. It can also be used for softening select red and brown scars, fine lines and wrinkles, and is perfect for those who want to see a dramatic difference in their skin.

Light Combination Peels - These peels help with blotchy, skin discoloration, the refinement of skin texture and to help reduce sun damage, precancerous conditions (keratosis) and scarring. The skin will be rejuvenated.

Epi-Combination Peels - This has a combination of two different treatments meshed together for greater results. There are a variety of treatments with a combination of micro dermabrasion and a light application of chemical peeling agents. This treatment will be customized to the patient's individual needs.

DermaSweep™ - The DermaSweep™ MD system is a state-of-the-art precision non-invasive exfoliation and skin revitalizing system.

Its flexibility, precision and control delivers optimum benefits and treats a wide variety of skin conditions and skin types.

From simple exfoliation to acne sacr reduction, the DermaSweep™MD system offers a customized treatment for fresher-feelino and healthier-looking skin.

Aesthetic Services Limited to Dee Bartolo and Ram-Prakash Khalsa:

Acupressure - Acupressure blends a variety of different techniques to balance the natural flow of energy in the body and mind. An acupressure expert uses gentle yet deep finger pressure on specific acu-points and verbal body focusing techniques, to help release chronic tension and balance or energy.

Through a series of sessions, the mind/body awareness increases while chronic muscle tension is progressively released in the neck, head, shoulders, chest, diaphragm abdominal and pelvic segments, and in the back, arms and legs.

During the session the client remains clothed and lies on his or her back while the acupressurist holds combinations of acu-points while the client determines the depth of the pressure. A feeling of safety in touch and a sense of wonder and synchronicity characterize the work. The client may share feelings or emotions that surface during the release of tension and stress, or just relax, even falling into a deep refreshing sleep.

Acupressure is now also being used in facials to relieve stress and tension, and help melt away the years.

Acugemlifting - The latest breakthrough in non-surgical facial rejuvenation, acugemlifting combines two proven methods that diminish lines and wrinkles, sculpt and tone the face, and restores your skin to radiant health. An immediate tightening of the skin should be noticed after one treatment.

Developed according to the principles of Chinese medicine, this treatment works in harmony with the natural energy systems of the body. An exclusive combination of gemstones, light and micro current re-educates facial muscles and addresses the underlying causes of visible aging. This unique, non-invasive, holistic system takes rejuvenation to the next level by providing the whole body renewal with results that go to a new level.

Acugemlifting is ideal for that special occasion. We recommend 2 treatments a week for 5-6 weeks for more long lasting and dramatic results, although some individuals see results after the very first treatment.

A Table for One, Two or Three

Our unique Tables for One, Two or Three let you customize your treatment to fit your specific needs.

A Table for 1

Imagine just you, in a dimly lit room, relaxing and soaking your feet while you detox. A table for one means you are treated to our amazing footbath that detoxes your entire body. Our osmotic footbath offers the latest in energetic cellular cleansing and detoxification even heavy metals can be pulled out of the body. The treatment can be done once to give you a boost, or in a series for a more complete detoxification.

A Table for 2

If you are in the mood for a little less solitude, our table for two is our way of saying there are two of us. It is just you and one of our expert Medical Aestheticians personalizing a facial treatment just for you.

A Table for 3

Experience the ultimate in harmony and relaxation as any of our facials are combined with our Acupressure treatment. That's right, two of our Medical Aestheticians will be working on you simultaneously and the result is pure bliss.
